prompt.prompt = ""
What will be the output of the following program?
```rust
fn main() {
    let initial_balance = 9;
    let initial_balance = initial_balance - 3;
    {
        let initial_balance = initial_balance * 2;
    }
    println!("Final balance is: {}", initial_balance);
}
```

answer.answer = "`Final balance is: 6`"
prompt.distractors = [
 "`Final balance is: 12`",
 "The program won't compile."
